

EVENT 02 · BHARAT BUILDS TOUR

STARTS IN 3 DAYS, 7 HOURS

Environmental Hacks

Bad air, heatwaves, floods, water shortage and waste are problems we see every day. In this hackathon, you pick one of these problems and build something that helps solve it. It can be a problem in your city, your college or your home.

The hackathon runs online Thursday to Sunday, with an optional build day at DTU, Delhi, on Saturday, Oct 10. Limited seats, and you get workshops, project feedback, time with the Amazon team, and swag.

HYBRID WEEK / OCT 8 - 11, 2026 — TEAMS OF 1 TO 4

ONLINE — THU - SUN

Oct 8 – 11

01 / PRIZES

Multiple tracks to win

Pick the problem you care about the most, and build something that helps fix it. The top 10 students from all three tracks get a fast-track interview at Amazon.

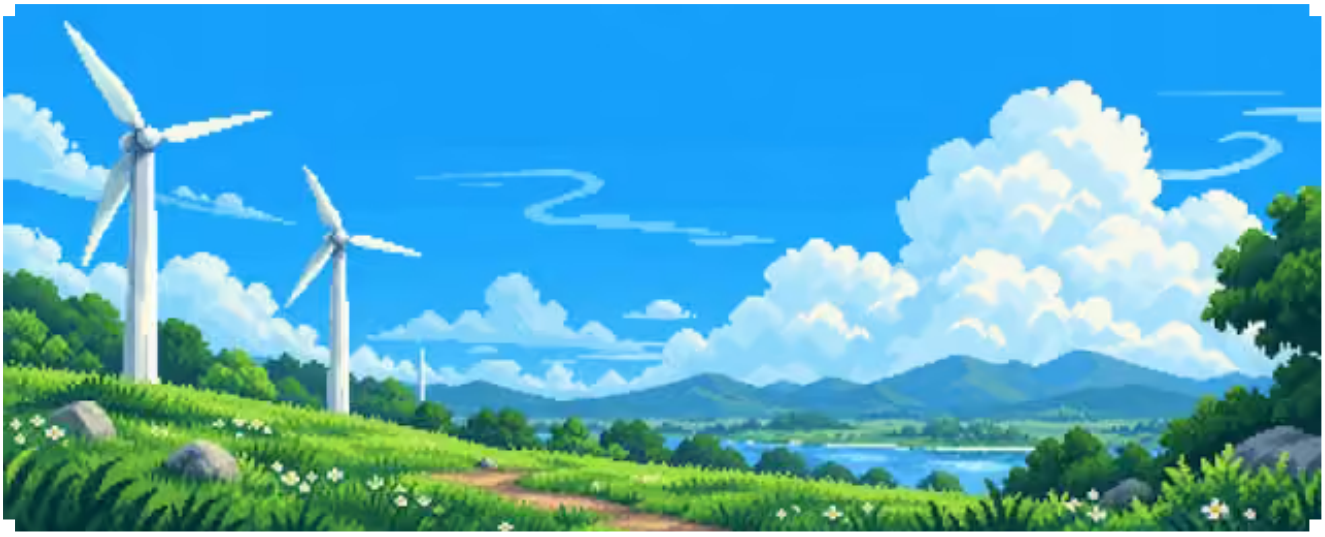

Fast-track interview at Amazon.

TOP 10 STUDENTS, ACROSS ALL THREE TRACKS

6 MONTHS INTERNSHIP, PLUS FULL-TIME ROLES

Top 10 students from top projects will skip screening rounds and get fast track interviews at Amazon.

READ THE RULES

TRACK 01

Air

Pollution, exposure, and the days the AQI goes off the chart.

TRACK WINNER

₹2,00,000

IN CASH

+ $2,000

IN AWS CREDITS, ON TOP

TRACK 02

Heat and Water

Heatwaves, floods, droughts, and every leak in between.

TRACK WINNER

₹2,00,000

IN CASH

+ $2,000

IN AWS CREDITS, ON TOP

TRACK 03

Waste and Energy

What we throw away, and how we power what we keep.

TRACK WINNER

₹2,00,000

IN CASH

+ $2,000

IN AWS CREDITS, ON TOP

$1,000

PER TEAM

TOP 4 RUNNERS-UP

AWS credits

IN AWS CREDITS, TO EACH TEAM

Four more teams take credits home, from across all three tracks. There is nothing extra to enter for: every submission is already in the running.

TOP 5 BLOGS

AirPods 5

TO 5 PEOPLE

Write up what you built: the problem, the stack, what fought back. Publish it on AWS Builder Center and link it in your submission.

TOUR SWAG

The tour kit

TO THE TOP TEAMS

Finish near the top of the board and the kit is yours, whether you built online or spent the Saturday with us in Delhi.

Pick a problem worth fixing

The problems under each track are a place to start, not a list to pick from. If it makes the air cleaner, the water safer or the city lighter, it fits.

01

Air

Help people breathe easier. Track what's in the air, warn the people most exposed to it, and change what happens on the bad days.

AQI | Pollution exposure | Stubble burning | Indoor air | School safety on bad days

02

Heat and Water

Too much water, too little of it, and the heat in between. Build for the monsoon that floods the street and the summer that dries the tap.

Heatwaves | Floods | Monsoon waterlogging | Droughts | Water tankers | Leaks | Groundwater

03

Waste and Energy

Close the loop on what a city throws away and cut what it burns. Sort it, recycle it, power it cleaner, and nudge people out of their cars.

Segregation | Recycling | E-waste | Informal recyclers | Rooftop solar | EV nudges | Public transport

TWO WAYS TO BUILD, IN ANY TRACK

You can build with AWS open source tools, AWS cloud services, or both. **To be eligible for prizes, your project needs to either use at least one AWS open source tool or be deployed on AWS.** Beyond that, you're free to bring in any other tools you like. The list below is just a starting point to help you get going, not a set of rules.

BUILD IT Open source, on your machine

No AWS account, no card, no bill.

SHIP IT Deployed, with a URL

Free tier: up to $200 in credits to start.

Agents and AI

BUILD IT Strands Agents SDK, PartyRock

SHIP IT SageMaker AI

Containers and Kubernetes

BUILD IT Finch, EKS Distro, EKS Anywhere

SHIP IT EKS, ECS, Fargate

Serverless

BUILD IT SAM CLI, LocalStack

SHIP IT Lambda, API Gateway, Step Functions

Servers and runtimes

BUILD IT Firecracker, Corretto

SHIP IT EC2, Lightsail, App Runner, Amplify Hosting

Data and search

BUILD IT OpenSearch

SHIP IT S3, DynamoDB, RDS, Aurora

Auth and policy

BUILD IT Cedar

SHIP IT Cognito

The plumbing

BUILD IT -

SHIP IT CloudFront, Route 53, EventBridge, SQS, SNS, CloudWatch

Deploying starts free

Nothing in the Ship It column needs a paid account. Sign up for the AWS Free Tier and you start with up to $200 in free credits, on top of the services that are always free, which is enough to deploy a project this weekend. Using it is completely valid.

SEE WHAT THE FREE TIER COVERS ↗

03 / RESOURCES

Everything you need to build

Verify you're a student, build on the AWS Free Tier, and read up on the tour as it goes. A new AWS account starts with up to $200 in free credits.

01 Verify you're a student on AWS Builder Center

One free profile, no credit card, two minutes. Every entry on the tour is checked against it, and verifying your enrollment unlocks $579 of rewards.

Verify you're a student ↗ Required to compete, and it unlocks rewards on your profile.

Hands-on workshops ↗

Hundreds of step-by-step labs, built by AWS.

Free sandboxes ↗

Eight-hour AWS environments, no account needed.

Your builder profile

Public, and yours to keep after the weekend.

02 Build on AWS, starting with the free tier

Start with the AWS Free Tier. A new AWS account comes with up to $200 in free credits on top of the services that are always free, which covers the weekend and counts in full for every track.

AWS Free Tier

A new account starts with up to $200 in credits.

The free tier, explained

Builder Center's guide to what it covers, and for how long.

Getting started with the free tier

What to know before you open an account.

Set up your dev environment

Get your machine ready to build on AWS.

Toolbox

AWS SDKs, open-source projects and language resources.

03 Blogs from the AWS tour

Guides, recaps and build notes written around the tour, in one place.

FROM THE TOUR READ THE BLOGS →

UP TO

$200

× aws

Salil Mittal

Every new AWS account starts with them, on top of the services that are always free. That is enough to build and deploy a project this weekend, and it counts in full for every track.

Create your AWS account

$100 lands when the account is created and the rest is earned through AWS's own onboarding activities. Debit cards and RuPay are accepted, and the verification charge is about ₹2.

04 / JUDGING

What judges look for

> We are looking for projects that make a real difference to the air people breathe, the water they depend on, and the waste and energy their cities run on.

01 Idea and Impact

Pick a track and find the problem inside it. **Does it fix a real environmental problem? And what changes for the people living with it?** A small problem solved well beats a big one solved vaguely.

02 Built on AWS

Build locally with AWS open-source tools, or deploy on AWS services. Start on the AWS Free Tier, which gives a new account up to $200 in credits. **Using an AWS open-source project or AWS services is mandatory to win a prize.**

03 Design and usability

The people living with the problem have to be able to use the fix: clear to pick up, easy to get around, and built for where they are. **Would someone who isn't on your team know what to do with it?**

04 The execution

Does it work? Not perfect, not polished. Working. One feature that runs beats five that almost do.

05 The demo video

Three minutes, recorded, to show what it does, who it is for, and where AWS fits. There is no live demo, so the video is what the judges see.

We judge what you built, not what you spent. Projects built locally and projects deployed on AWS are scored with the same care, and each track is judged on its own.

05 / FAQ

Got questions?

- What is the theme? +
- Do I have to pick a track? +
- What happened to Build It and Ship It? +
- Do I need to know AWS? +
- How do I build on AWS without paying? +
- Do I need a credit card? +
- How do the fast-track interviews at Amazon work? +
- Can I participate online? +
- Where is the build day? +

How do I attend in person?

Does joining in person help my chances?

Where can I read up before the weekend?

Who can participate?

How big can a team be?

Is it free?

I took part in First Commit. Can I enter this one too?

Will I get a certificate?

Can I start building before the event?

06 / COMMUNITY

Where to ask, and where to find a team

Nobody builds this weekend alone. Bring a question, or turn up without a team and leave with one.

WeMakeDevs Discord

The fastest way to reach us. Ask anything about the hackathon, find teammates in the team-forming channels, and get help while you build.

Join the Discord

WeMakeDevs space on AWS Builder Center

Where the tour's updates and announcements are written down and stay findable. Introduce yourself, say what you're building, and see who else is building near you.

Join the space ↗

07 / IN PERSON

Spend the Saturday with us at DTU, Delhi

The hackathon runs online for all four days. Oct 10 is an optional build day in the room, with limited seats.

SATURDAY, OCT 10

Delhi Technological University ↗

Shahbad Daulatpur, Main Bawana Road, Delhi 110042

HOSTED WITH

WHO YOU WILL MEET

Piyush Garg ↗

FOUNDER, TEACHYST

Kunal Kushwaha ↗

FOUNDER, WEMAKEDEVS

Saiyam Pathak ↗

FOUNDER, KUBESIMPLIFY

Workshops in the room

Hands-on AWS sessions, run in front of you.

Feedback on your project

Show what you have and get it pulled apart in time to fix it.

Meet the Amazon team

The people behind the services you are building on.

Swag to take home

Tour swag on the day, whether or not you place.

Apply on Luma ↗ | 8 AM TO 8 PM | LIMITED SEATS

Two signups: check in for the hackathon on this page, then apply on Luma for the Saturday at DTU. The day is optional, and being there adds nothing to your score. Everything judged happens online.

EVENT 02 OF 06

Build what the planet needs.

Four days, three tracks, and a problem worth fixing. Your tour signup covers every event, so check in here and start building.

✓ Registered | View ticket

DTU IN DELHI HOSTS THE BUILD DAY. ONLINE IS OPEN TO ALL OF INDIA.

Helping great developer tools reach the builders who will shape the future.
